ATTN: Mr. William E. Cline, Chief
Radiological Protection and
Emergency Preparedness Branch

Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
EMERGENCY PLAN, REVISION 14

Your review of Revision 14 to the Emergency Plan indicated that two changes were not consistent with previous plan commitments. These commitments are: (1) clarification regarding the total time to complete relocation from the primary emergency operation facility (EOF) to the backup EOF and (2) reinstatement of respirators to the field monitoring kits.

It is intended that Revision 15 to the Emergency Plan incorporate the NUMARC Methodology for Emergency Action Levels. This revision will require NRC approval and retraining of the plant staff before implementation. Therefore, it is proposed to correct the Revision 14 commitment in Revision 16 which will be submitted to the NRC prior to December 15, 1992. The corrections to the Revision 14 commitments will be as indicated on the Emergency Plan pages attached. Respirators are presently in the Field Monitoring kits as required by emergency plan implementing procedure (EPIP) 91702-C and as indicated in Appendix 4 to the Emergency Plan.

This confirms the telephone conversation with Mr. Bill Rankin of your office on April 29, 1992.

If there are any additional questions pertaining to these changes, please contact Mr. J. N. Roberts at (706) 826-3416.

Sincerely,

C.K. McCoy
