Huntersville, NC 28078-8985

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-369/92-10 AND 50-370/92-10

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by Mr. P. K. VanDoorn on March 22 - April 18, 1992. The inspection included a review of activities authorized for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies activities that violated NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and/or correcting the violation meet the criteria specified in Section VII.B of the Enforcement Policy. This non-cited violation involved unnecessary opening of nuclear service water valves to the suction of the turbine driven auxiliary feedwater pump.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, (Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
