Gentlemen:

This refers to the Nuclear Regulatory Commission (NRC) administered examinations led by Richard S. Baldwin during the period of December 11-15, 1995. The examinations were administered to employees of your organization who had applied for licenses to operate the Vogtle Electric Generating Plant. At the conclusion of the examination, the examinations and preliminary findings were discussed with those members of your staff identified in the NRC Examination Report, Enclosure 1.

A Simulator Facility Report is included in this report as Enclosure 2. A copy of the written examination questions and answer key, is included in this report as Enclosure 3. The NRC's resolution of facility comments is included in this report as Enclosure 4.

In April 1995, four candidates from your facility participated in the Generic Fundamentals Examination. Of the four examined, four passed for a 100 percent pass rate.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this examination, please contact us.

Sincerely,
