Enclosed is the transcript of a Commission meeting of September 5, 1984 at which the NRC staff summarized for the Commission the evidence on risk issues which it had presented to the licensing board in the Special Proceeding. The Commission has scheduled another meeting with the staff on the risk issues for October 2, 1984, at 2:00 p.m. The Commission is considering as well the possibility of a meeting at which the parties to the proceeding can present their views to the Commission on the risk issues.

In the interim, the Commission invites the parties to submit to it their comments on the staff's September 5, 1984 presentation. These comments should be no more than fifteen pages, double-spaced, and should be received by this office by c.o.b. September 26, 1984.
