Docket No. 52-002

Attn: Document Control Desk  
J.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Nuplex 80+™ Human Factors Engineering Standards, Guidelines,  
and Bases

Dear Sirs:

Enclosed with this letter is a report, "Human Factors Engineering Standards, Guidelines, and Bases for Nuplex 80+" which provides information to supplement previous RAI responses on human factors engineering of the control room. This information fulfills commitments made at the April 17, 1992 design review meeting.

If you have any questions, please call me or Mr. Stan Ritterbusch at (203) 285-5206.

Very truly yours,

COMBUSTION ENGINEERING, INC.
