

REVISION 5

PRAIRIE ISLAND NUCLEAR GENERATING PLANT  
OFFSITE DOSE CALCULATION MANUAL (ODCM)

CHANGES TO TABLE 3.2-1, PI VALUES FOR INFANTS

Errors resulted in this table when the NRC no longer required pathways other than inhalation to be considered in showing compliance with the 10 CFR Part 20 release rate limit for iodines, particulates and tritium.

The errors developed when this table was modified by removing the Pi columns for all pathways except inhalation. The correct process is to use Table E-10 of Regulatory Guide 1.109 and choose the largest dose factor for each isotope.

We have computed corrected PiI values. A revised Table 3.2-1 is attached.

Instructions for Entering Revision 5 to the  
Prairie Island ODCM

1. Remove ODCM cover page and pages III, IV, V, VI, 3-10, and 3-11 and replace them with the attached pages.
2. Use ODCM page VI to page check your manual if desired.

## LIST OF TABLES

<u>Tables</u>		<u>Page</u>
2.1-1	Liquid Source Terms For PNGP	2-6
2.3-1	$A_i$ Values for the PNGP	2-14
3.1-1	Monitor Alarm Setpoint Determination For PNGP	3-4
3.1-2	Gaseous Source Terms For PNGP	3-5
3.1-3	Dose Factors and Constants	3-6
3.2-1	$P_i$ Values for the PNGP	3-11
3.3-1	Dose Factors for Noble Gases and Daughters	3-19
3.3-2	$R_i$ Values for the PNGP - Ground, All Ages	3-20
3.3-3	$R_i$ Values for the PNGP - Vegetable, Adult	3-21
3.3-4	$R_i$ Values for the PNGP - Vegetable, Teen	3-22
3.3-5	$R_i$ Values for the PNGP - Vegetable, Child	3-23
3.3-6	$R_i$ Values for the PNCP - Meat, Adult	3-24
3.3-7	$R_i$ Values for the PNCP - Meat, Teen	3-25
3.3-8	$R_i$ Values for the PNCP - Meat, Child	3-26
3.3-9	$R_i$ Values for the PNGP - Cow Milk, Adult	3-27
3.3-10	$R_i$ Values for the PNGP - Cow Milk, Teen	3-28
3.3-11	$R_i$ Values for the PNGP - Cow Milk, Child	3-29
3.3-12	$R_i$ Values for the PNGP - Cow Milk, Infant	3-30
3.3-13	$R_i$ Values for the PNGP - Goat Milk, Adult	3-31
3.3-14	$R_i$ Values for the PNGP - Goat Milk, Teen	3-32
3.3-15	$R_i$ Values for the PNGP - Goat Milk, Child	3-33
3.3-16	$R_i$ Values for the PNGP - Goat Milk, Infant	3-34
3.3-17	$R_i$ Values for the PNGP - Inhalation, Adult	3-35
3.3-18	$R_i$ Values for the PNGP - Inhalation, Teen	3-36

LIST OF TABLES (Continued)

<u>Tables</u>		<u>Page</u>
3.3-19	R <sub>i</sub> Values for the PNGP - Inhalation, Child	3-37
3.3-20	R <sub>i</sub> Values for the PNGP - Inhalation, Infant	3-38
5.1-1	PNGP - Radiation Environmental Monitoring Program Sampling Locations	5-3

RECORD OF REVISIONS

<u>Revision No.</u>	<u>Date</u>	<u>Reason for Revision</u>
Original	June 7, 1979	-
1	April 15, 1980	Incorporation of NRC Staff comments and correction of miscellaneous errors
2	Aug 6, 1982	Incorporation of NRC Staff comments
3	Feb 21, 1983	Change in milk sampling location
4	Nov. 14 1983	Change in milk sampling location and change in cooling tower blowdown
5	March 27, 1984	Change Table 3.2-1

Significant short-term batch releases of long-lived radioactive particulates and tritium will result from containment purges. Calculations will be made for these releases separately to further assure compliance with 10 CFR Part 20 prior to release. These calculations will be used only to determine whether or not the purge release will be allowed to occur. Source terms will be determined from the results of isotopic analyses of samples from containment prior to release. Equation 3.2.1 will be used in conjunction with the following relationship to demonstrate that the batch release does not exceed the dose rate limit:

$$BL = 1500 - (D_v - D_p) \quad (3.2-2)$$

where

$BL$  = limiting dose rate for the batch, mrem/yr;

$D_v$  = previous week's doses from all vent releases, mrem/yr;

$D_p$  = previous week's doses from all purge releases mrem/yr.

### 3.2.3 Critical Receptor Identification

The atmospheric dispersion parameters given in Appendix A will be used to identify the critical receptor. Compliance with Part 20 will always be shown at the site boundary location with the highest  $X/Q$ . As discussed previously, weekly and batch dose calculations will be performed at this location. The critical site boundary location, based upon long term ground level releases  $X/Q$  (Table A-3), is 0.36 miles in the WNW sector.
