PDR

MEMORANDUM TO: See Attached List

FROM: *son* Alfred E. Chaffee, Chief
Events Assessment and Generic
Communications Branch,
Division of Reactor Program Management, NRR

E F Godwin

SUBJECT: NRR QUARTERLY STATUS REPORT ON GENERIC ACTIVITIES
(PUBLIC VERSION)

As part of NRR's continuing efforts to make information on its activities more accessible to the public, we have prepared a status report on NRR generic activities. A copy of this report, along with transmittal letter, is attached for your information.

The attached status report is an abbreviated version of the January NRR Director's Monthly Status Report on NRR Generic Activities. The report includes information on NRR action plans, with certain internal details (resources, problems) deleted. Also included is information on generic communication and compliance activities (GCCA). These issues include generic communications under development relating to reactors, and other generic issues under review that are of less significance/complexity than those covered by an action plan, and where a generic communication is not presently planned. To avoid confusion with the Regulatory Agenda, no status information on NRR rulemaking activities is included in this report.

The list of generic communications noted above replaces the "list of generic communications under development" previously distributed on a monthly basis via a transmittal memo addressed to INPO.

We will plan to issue updates of this report quarterly. We are presently working to make this status report electronically accessible through the Internet. Please contact Stephen Koenick at (301) 415-2841 [SSK2] if you wish to receive future copies of the public version of the status report.
