EXAMINATION SUMMARY

Examination Report 50-277/96-02 and 50-278/96-02 (OL)

Initial simulator retake examinations were administered to three senior reactor operator (SRO) applicants on January 18, 1996, at the Peach Bottom Atomic Power Station, Units 2 and 3. All applicants passed the examination.

DETAILS

1.0 INTRODUCTION

The NRC administered initial simulator retake examinations to three senior reactor operator (SRO) applicants. The examinations were administered in accordance with NUREG-1021, "Examiner Standards," Revision 7.

2.0 PREEXAMINATION ACTIVITIES

The simulator scenarios were validated on January 17, 1996, on the facility's simulator. The facility staff who were involved with these reviews signed security agreements to ensure that the initial examinations were not compromised.

3.0 EXAMINATION RESULTS AND RELATED FINDINGS, OBSERVATIONS AND CONCLUSIONS

3.1 Examination Results

The results of the examinations are summarized below:

	SRO Pass/Fail	RO Pass/Fail
Written	N/A	N/A
Operating	3/0	N/A
Overall	3/0	N/A

3.2 Facility Strengths and Weaknesses

Due to the small size of the examination group, no strengths or weaknesses were noted. However, in contrast to prior examinations, the examination team noted that crew briefs in the simulator were conducted appropriately.

4.0 EXIT MEETING

An exit meeting was conducted on January 18, 1996. Preliminary strengths and weaknesses on the operating tests were presented. The support given by all of the PECO Energy personnel enabled the examination to be developed and administered very efficiently and effectively.

Persons contacted and attendees at the exit meeting are listed below:
