 Lisle, Illinois 60532-4351

FILE Last

Dear Mr. Miller:

Enclosed is a copy of the final report for the September 20, 1995 exercise for the Davis-Besse Nuclear Power Station. Copies of this report have been provided to the Toledo Edison Company, the State of Ohio, Ottawa County, and Lucas County.

No Deficiencies were identified during this exercise. There were, however, four Areas Requiring Corrective Action (ARCA) identified during this exercise: one for the State of Ohio, and three for Ottawa County.

Based on the results of the September 20, 1995 exercise, the offsite radiological emergency response plans and preparedness for the State of Ohio, Ottawa and Lucas Counties site-specific to Davis-Besse Nuclear Power Station, can be implemented. These plans are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350, approval of the offsite radiological emergency response plans and preparedness for the State of Ohio site-specific to Davis-Besse Nuclear Power Station, granted on March 15, 1991 will remain in effect.

Please contact Terri Murphy-Rosen at (312) 408-5595 if you have any questions.

Sincerely,

Michelle M. Burkett
 Michelle M. Burkett
