Vice President  
Nuclear GenerationFebruary 7, 1996  
NMP2L 1607U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555RE: Nine Mile Point Unit 2  
Docket No. 50-410  
NPF-69

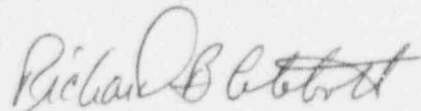

Gentlemen:

Niagara Mohawk's letter dated October 25, 1995 (NMP2L 1589), submitted proposed changes to the Technical Specifications set forth in Appendix A to the above-mentioned license. The proposed changes involve position title changes and the reassignment of responsibilities at the upper management level. This letter supplements our October 25, 1995, submittal. Enclosed is a revised page 6-7, which was not included in our original submittal.

Niagara Mohawk has discovered that a minor change to Technical Specification Section 6.2.3.4 (page 6-7) should have been proposed in conjunction with proposed changes to Sections 6.2.3.1 and 6.2.3.3 (page 6-3). Technical Specification Section 6.2.3 describes the function, composition, and responsibilities of the Independent Safety Engineering Group (ISEG). Revisions to Sections 6.2.3.1 and 6.2.3.3 were included in the proposed license amendment recognizing that the ISEG would report to the Vice President - Nuclear Safety Assessment and Support rather than the Vice President - Nuclear Engineering. This reassignment of responsibility also affects Section 6.2.3.4. Section 6.2.3.4 should be changed to reflect that records of activities performed by the ISEG be forwarded each calendar month to the Vice President - Nuclear Safety Assessment and Support.

Niagara Mohawk requests that the enclosed proposed change to Technical Specification Section 6.2.3.4 be included as part of our Application for Amendment dated October 25, 1995. The proposed change to Technical Specification 6.2.3.4 is consistent with related changes previously proposed and evaluated for Sections 6.2.3.1 and 6.2.3.3 and does not change the no significant hazards consideration determination. We apologize for any inconvenience this oversight may have caused.

Very truly yours,

Richard B. Abbott  
Vice President - Nuclear Generation
