Dear Mr. Parker:

SUBJECT: PRAIRIE ISLAND NUCLEAR GENERATING PLANT, UNIT NOS. 1 AND 2 -
REVISED REQUEST FOR RELIEF FROM THE SCHEDULE REQUIREMENTS
OF NRC BULLETIN 89-02 (TAC NOS. M82499 AND M82500)

Dear Mr. Parker:

By letter dated February 18, 1992, you requested relief from the schedular requirements of NRC Bulletin 89-02. The basis for your request is the unavailability of replacement parts and ALARA considerations. In your letter, you state that inspection of the remaining Unit 2 residual heat removal pump discharge valve will be completed prior to the Fall 1992 Unit 2 outage, presently scheduled to begin on October 28, 1992.

We have reviewed your request and find it to be reasonable. The inspection schedule you have proposed is acceptable. We ask that you inform us when the inspection has been completed so that full implementation of Bulletin 89-02 is reflected in our records. Technical Assignment Control (TAC) Numbers M82499 and M82500, which were opened to review the relief request, will be closed.

Sincerely,

Original signed by William O. Long FOK
