Dear Mr. Creel:

SUBJECT: OPERATOR EXAMINATION REPORT NO. 50-317/92-11 AND
50-318/92-11 (OL)

From April 27 - May 1, 1992, the NRC administered examinations to fifteen employees of your company who had applied for licenses to operate the Calvert Cliffs Nuclear Power Plant, Units 1 and 2 to assure safe operation of the facility. In addition, one licensed reactor operator was administered a written requalification examination retake. At the conclusion of the examination, preliminary findings and observations were discussed with those members of your staff identified in the enclosed report.

Based on the results of the examinations, all seven of the reactor operator (RO) candidates passed the examination and were granted licenses. Seven of the eight senior reactor operator (SRO) candidates passed their examination and were granted licenses. One SRO candidate failed the operating portion of the examination. The licensed reactor operator passed the written requalification examination retake.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
