Docket No. 50-352

Philadelphia Electric Company
ATTN: Mr. John S. Kemper
Vice President
Engineering and Research
2301 Market Street
Philadelphia, PA 19101

Gentlemen:

Subject: Letter of Agreement

This refers to your letter dated May 14, 1984 requesting a review of the existing letter of agreement between NRC Region I and Philadelphia Electric Company for Limerick Generating Station dated July 23, 1979.

In keeping with its statutory responsibility to regulate nuclear activities in order to protect the public health and safety and to preserve environmental quality, the NRC must be prepared to respond quickly to any incident involving NRC licensed activities that pose a potential threat to the public and the environment. The Region I Incident Response Supplement to NUREG-0845 dated April 1983, sets forth the regional activities which will be undertaken to ensure that NRC statutory responsibilities are fulfilled.

The Supplement describes NRC Region I response to incidents involving licensed power plants, materials facilities and transportation accidents and assigns responsibilities for emergency planning and response. The Supplement also discusses the degree of cooperation and interaction with local, state, and other federal organizations needed to help in meeting NRC statutory responsibilities. The Supplement contains separate implementing procedures which delineate the manner in which each function is to be performed, the criteria to be used in decision making, and how the responsibilities assigned are to be exercised.

Our response to an incident at the Limerick Generating Station will be in accordance with this document. If there are any further questions concerning the Region I incident response, please contact Dr. Ronald R. Bellamy of my staff at (215) 337-5200.

Sincerely,

Original signed by
Thomas E. Murley
