Re: Docket Nos. 50-352
50-353

Dr. Thomas E. Murley, Administrator
U. S. Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, PA 17406

Dear Dr. Murley:

Subject: Letter of Agreement for Philadelphia Electric Company's
Limerick Generating Station

Philadelphia Electric Company's (PECo) Limerick Generating
Station's (LGS) Emergency Plan is currently undergoing revision and
updating as required by NUREG-0654 and 10CFR50. To complete this,
letters of agreement must be reviewed on an annual basis.

We would appreciate your review of the existing letter of
agreement between NRC Region I and PECO for LGS dated July 23, 1979.

We would appreciate receiving your letter of agreement by May
31, 1984.

Thank you for your cooperation.

Very truly yours,

Original signed by
S. L. DALTROFF

Docket Nos. 50-352
50-353

JUL 23 1979

Philadelphia Electric Company
Limerick Generating Station
ATTN: Mr. G. M. Leitch
Station Superintendent
P. O. Box A, Sanatoga Branch
Pottstown, Pennsylvania 19464

Gentlemen:

This letter is being sent in response to your request regarding the participation of the Nuclear Regulatory Commission in the event of an emergency at the Limerick Generating Station - Units 1 & 2.

The primary role of the NRC during a radiation emergency is that of conducting investigative activities associated with the incident and verifying that emergency plans have been implemented and proper agencies notified. In addition, however, if NRC personnel are dispatched to the scene, they will, as needed, assist in coordination with the Department of Energy Radiological Assistance Team and provide to state and local agencies advisory assistance associated with investigating and assessing hazards to the public.

Sincerely,

Boyce H. Grier
Director
