

September 18, 1984

Docket No.: 50-219
LS05-84-09-20

Mr. P. B. Fiedler
Vice President & Director
Oyster Creek Nuclear Generating Station
Post Office Box 388
Forked River, New Jersey 08731

Dear Mr. Fiedler:

SUBJECT: LICENSEE REQUEST TO DEFER MODIFICATIONS OF
MASONRY WALL NO. 21 (IE BULLETIN 80-11)

Re: Oyster Creek Nuclear Generating Station

We have evaluated your request to defer modifications of masonry wall no. 21 (actions resulting from activities associated with IE Bulletin 80-11) from the current refueling/maintenance outage (Cycle 10) with a commitment to complete the needed modification prior to restart after the next refueling outage. The enclosed evaluation is based on your submittal dated May 11, 1984, and is supplemental to the staff's earlier evaluation dated March 27, 1984, regarding deferment of modifications to several other walls to the next refueling outage.

Based on our review we conclude that deferring the modifications to wall no. 21 to the next refueling outage is acceptable.

Please note that this evaluation only addresses your request for deferment of modifications of wall no. 21. It does not address the on-going staff review of IE Bulletin 80-11 responses for Oyster Creek. It also does not preclude additional modifications to the wall which may result from that review.

Sincerely,

Original signed by

Walter A. Paulson, Acting Chief
