Docket Nos. 50-352
50-353

License Nos. NPF-39
NPF-85

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

SUBJECT: Limerick Generating Station, Units 1 and 2
Response to Request for Additional Information Regarding Review of Individual
Plant Examination of External Events

REFERENCE: Telecon between NRC (F. Rinaldi and J. Chen) and PECO Energy Company
(J. Basilio, A. Marie, and J. Phillabaum) on January 18, 1996

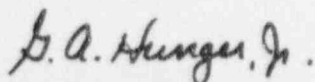

Dear Sir:

Your Request for Additional Information which was transmitted by letter dated December 22, 1995, requested a response within 60 days. As discussed in the reference telecon, PECO Energy Company (PECO Energy) proposes to provide a response by July 1, 1996. Personnel who will provide our response are presently working to complete the Individual Plant Examination of External Events (IPEEE) for Peach Bottom Atomic Power Station, Units 2 and 3 (PBAPS). The PBAPS IPEEE is scheduled for submittal by May 31, 1996. Therefore, to permit the timely completion of the PBAPS IPEEE, PECO Energy requests additional time to provide responses to the subject Request for Additional Information.

Another issue discussed in the reference telecon involved the completion of actions described in the Limerick Generating Station (LGS) IPEEE. Section 7.2 of the LGS IPEEE describes corrective actions. These actions have been completed on schedule with the exception of several housekeeping and maintenance concerns and administrative control of additional doors as "fire" doors. Completion of these corrective actions is scheduled to be accomplished by May 31, 1996.

If you have any questions, please contact us.

Sincerely,

G. A. Hunger, Jr.,
Director-Licensing
