ARLINGTON, TEXAS 76011-8064

JUN 11 1992

Docket No. 50-458  
License No. NPF-47

Gulf States Utilities  
ATTN: James C. Deddens  
Senior Vice President (RBNG)  
P.O. Box 220  
St. Francisville, Louisiana 70775

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-458/92-14.

This refers to the inspection conducted by Mr. M. Modes and his staff of our Region I office on May 4-15, 1992. The inspection included a review of activities authorized for your River Bend Station facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report and pertained to independent nondestructive examinations of selected areas of the reactor coolant injection, reactor water cleanup, residual heat removal, feedwater, safety relief valve, main steam, standby liquid control, and control rod drive systems.

Within the scope of the inspection, no violations or deviations were identified. The results of this inspection indicate a strength in the implementation of the inservice inspection program at River Bend Station.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
A. Bill Beach, Director  
Division of Reactor Projects
