

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

June 10, 1992

Docket No. 50-346

Mr. Sushil Jain
Director Engineering - Davis-Besse
Toledo Edison Company
300 Madison Avenue
Toledo, Ohio 43652

Dear Mr. Jain:

SUBJECT: CURRENT LICENSING BASIS WORKSHOP - PANEL INFORMATION

The current licensing basis (CLB) workshop is developing nicely with the panel members confirmed and the industry interest growing. We look forward to the exchange of information and ideas from each of the panels and participants. To assist you in the panel formulation, we consolidated the NRC's and the licensees' comments and suggestions for each panel, and this information was provided to you. The panel members should be encouraged to present information within the area of the panel. This will keep each panel focused and allow questions from the participants as necessary. In this regard, about half of the allotted time should be spent on presentation and the remaining time on questions from the attendees.

We have collected the names of presenters, panel chairmen, and panel members with their telephone numbers and have included the list as Enclosure 1. Enclosure 2 consists of copies of biographical data sheets provided by the panel members for use in introductions and general use.

We are preparing workshop notebooks for the participants to collect and store the information from the workshop. In addition to general information which we will prepare, the notebook should contain any viewgraphs or prepared information from the panel itself. We are prepared to copy the panel's information and have it available at the workshop if your members will provide a reproducible copy in advance to this office. Please attempt to get us the copy no later than June 19, 1992; we will accommodate late arrivals, but it will be difficult. By copy of this letter, the panel members are notified of this request.

NAME OF PLANT: Grand Gulf Nuclear Station

NAME OF UTILITY: Entergy Operations, Inc.

WORK ADDRESS AND PHONE:

P O Box 756

Port Gibson, MS 39150

(601) 437-6470

WORK ASSIGNMENTS RELATED TO WORKSHOP:

Mr. Meisner directs the activities of the Nuclear Safety & Regulatory Affairs Department which is responsible, in part, for maintaining the Grand Gulf license basis.

PERTINENT BIOGRAPHICAL INFORMATION:

See attached.

Mike J. Meisner**Director of Nuclear Safety & Regulatory Affairs**

Mr. Meisner has 11 years of experience in the nuclear industry following graduation from the University of Wisconsin with a degree in Nuclear Engineering. For the last year and a half, Mike has been the Director of Nuclear Safety & Regulatory Affairs for Entergy Operations', Grand Gulf plant. This department combines the traditional functions of licensing, operational experience and independent safety evaluation. Before moving to Grand Gulf Mike was the Nuclear Licensing & Regulatory Affairs Manager for Entergy Operations' Waterford 3, a Combustion Engineering PWR. He has been involved in numerous industry activities related to regulation, particularly through the Combustion Engineering Owners Group and NUMARC Working Groups and Committees.
