

June 10, 1992

Docket Nos. 50-352
and 50-353

Mr. George J. Beck
Manager-Licensing, MC 52A-5
Philadelphia Electric Company
Nuclear Group Headquarters
Correspondence Control Desk
P.O. Box No. 195
Wayne, Pennsylvania 19087-0195

Dear Mr. Beck:

SUBJECT: STATION BLACKOUT ANALYSIS, LIMERICK GENERATING STATION, UNITS 1 AND 2 (TAC NOS. M68561 AND M68562)

My letter to you of June 3, 1991 provided our evaluation of your response to the Station Blackout (SBO) Rule, 10 CFR 50.63. We found your proposed method of coping with the SBO to be acceptable, subject to satisfactory resolution of several issues which were discussed in the safety evaluation (SE) enclosed with the above letter. You supplemented your initial responses with your letters of September 4, 1991 and February 14, 1992. There were also a number of teleconferences with your staff on February 3, 19, 21 and 25, 1992 and a meeting with us on April 16, 1992 to resolve concerns pertaining to Loss of Ventilation and Inverter operability.

Your supplemental submittals and subsequent discussions with your staff have resolved all issues related to station blackout. A copy of our Safety Evaluation is enclosed. Your cooperation with us in resolving this issue is appreciated. We have determined that the Limerick Generating Station conforms with the SBO Rule.

Sincerely, Original signed by
Richard J. Clark
