Docket No. 50-341

Mr. William S. Orser
Senior Vice President - Nuclear
Operations
Detroit Edison Company
6400 North Dixie Highway
Newport, Michigan 48166

Dear Mr. Orser:

SUBJECT: FERMI-2 - NRC SUPPLEMENTAL SAFETY EVALUATION - IMPLEMENTATION OF THE
STATION BLACKOUT RULE (SBO), 10 CFR 50.63 (TAC NO. 31254)

We received your letter dated May 20, 1992, NRC-92-0068, responding to our
April 9, 1992 supplemental safety evaluation on Fermi-2 SBO. Your proposed
schedule of July 31, 1992 for procedural revisions is acceptable. We request,
however, that you confirm in writing when your procedure revisions (if any)
have been completed and operators have been trained to the new procedures.

This will facilitate data entry into our computer tracking system. We
appreciate your consideration in this area. If you have any questions, please
contact me at (301) 504-1341.

The reporting and/or recordkeeping requirements of this letter affect fewer
than ten respondents; therefore, OMB clearance is not required under
P. L. 96-511.

Sincerely,

Original signed by
Timothy G. Colburn, Sr. Project Manager
