In the Matter of
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA
(UCLA Research Reactor)
Docket No. 50-14202
(Proposed Renewal of Facility License)

Dear Administrative Judges:

For your information I am enclosing a copy of the "Notice of Proposed Issuance of Orders Authorizing Disposition of Component Parts and Terminating Facility License" recently sent to the office of the Federal Register for publication. As noted by the attached service list, the parties have been served.

Sincerely,

Colleen P. Woodhead
Counsel for NRC Staff

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-142UNIVERSITY OF CALIFORNIA, LOS ANGELESNOTICE OF PROPOSED ISSUANCE OF ORDERSAUTHORIZING DISPOSITION OFCOMPONENT PARTS AND TERMINATINGFACILITY LICENSE

The U. S. Nuclear Regulatory Commission (Commission) is considering issuance of Orders authorizing the University of California, Los Angeles, (licensee) to dispose of the component parts of the research reactor in their possession, and terminating Facility Operating License No. R-71 in accordance with the licensee's application dated July 26, 1984.

The first of these Orders would be issued following the Commission's review and approval of the licensee's detailed plan for disposal of the radioactive components of the reactor and decontamination of the facility or some alternate disposition plan for the facility. This Order would authorize implementation of the approved plan. Following completion of the authorized activities and verification by the Commission that acceptable radioactive contamination levels have been achieved, the Commission would issue a second Order terminating the facility license. Prior to issuance of each Order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

- 2 -

By _____, the licensee may file a request for a hearing with respect to issuance of either or both of the subject Orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate Order.

As required by 10 CFR §2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any Order which may be entered on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which

- 3 -

petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the actions under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the Order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C. by the above date. When petitions are filed during the last ten (10) days of the notice period, it is requested

- 4 -

that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Cecil O. Thomas: (petitioner's name and telephone number); (date petition was mailed); (University of California, Los Angeles) and (publication date and page number of this Federal Register Notice). A copy of the petition should also be sent to the Executive Legal Director, U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to William H. Cormier, Esq., Office of Administrative Vice Chancellor, University of California, 405 Hilgard Avenue, Los Angeles, California 90024.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 52.714(a)(i)-(v) and 2.714(d).

For further details with respect to this action, see the licensee's application dated July 26, 1984, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C.

Dated at Bethesda, Maryland, this 14 day of September 1984.

FOR THE NUCLEAR REGULATORY COMMISSION

Cecil O. Thomas, Chief
Standardization and Special
Projects Branch
Division of Licensing
