Mr. Richard W. Starostecki  
Director, Division of Projects &  
Resident Programs, Region I  
United States Nuclear Regulatory Commission  
631 Park Avenue  
King of Prussia, PA 19406

Subject: Open Items Report for PECO  
Limerick Generating Station, Unit 1

File: GOVT 1-1

Dear Mr. Starostecki:

In resolving Region I open items related to Limerick I, we have identified the following item which will not be fully resolved prior to fuel load.

We have provided information regarding this item to the degree available to the Resident NRC Inspector.

We are providing in this letter the rationale for why it is acceptable for this item to remain open for fuel loading. This information should be sufficient for your consideration prior to fuel load.

NRC Item No.

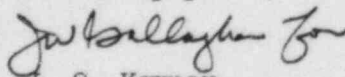

Remarks

84-21-03

Verify that trend analysis considers all corrective action systems and that administrative control exists.

Administrative controls for trending will be in place prior to commercial operation. As indicated in the NRC Inspection Report 84-21-03, this item is not required for fuel load.

Sincerely yours,

J. S. Kemper  
Vice President
