Gentlemen:

This refers to the inspection conducted by Messrs. T. O. Martin and J. P. Kearney of the NRC Office of Inspection and Enforcement during the period May 7-11, 1984, of activities authorized by NRC Operating License DPR-40 for Fort Calhoun Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The maintenance program was inspected. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. Consequently, you are required to respond to these violations, in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

Unresolved Item 285/8412-03, described in the enclosed inspection report in paragraph 2.c., pertains to an apparent false statement made in your response to IE Bulletin 82-02. After consideration by the NRC, further enforcement action may be issued regarding this matter. Additionally, we acknowledge your July 2, 1984 letter (LIC-84-209) providing a corrected response to IE Bulletin 82-02.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter, and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
