Subject: CROSS-CHECK ANALYSES OF SLAG SAMPLES FROM SHIELDALLOY
CORPORATION - CAMBRIDGE, OH

Dear Dr. LaRoche:

Attached are the results of our program's analyses on 15 samples of slag from the Shieldalloy/Cambridge site, provided to ORAU by ENSR. The ENSR data for these same samples are also included for comparison. As noted from these results there appears to be general agreement between the ORAU and ENSR data. Twenty three of the 42 data pairs agree within their associated 95% confidence levels.

The greatest differences appear in the RA-226 values at concentrations above 20 pCi/g; the ORAU measurements for these samples are 20-30% higher than those provided by ENSR.

Sincerely,

James D. Berger, Director
Environmental Survey and
Site Assessment Program
