Re: 10CFR50.90

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Millstone Nuclear Power Station, Unit No. 2  
Proposed Revision to Technical Specifications  
Service Water Pump Flood Protection

By letter dated December 16, 1994,<sup>(1)</sup> Northeast Nuclear Energy Company (NNECO) submitted an amendment request to the NRC Staff which would revise the Technical Specifications (TS) of Millstone Unit No. 2. The proposed changes would modify the Limiting Conditions for Operation (LCO) for TS 3.7.5.1.b, "Plant Systems-Flood Level," and correct a value listed in TS Table 3.3-8, "Meteorological Monitoring Instrumentation." The proposed LCO changes had no significant operational impact, but were intended to provide increased uniformity for station severe weather meteorological monitoring. The table change was to correct a typographical error in the table listing.

The purpose of this letter is to withdraw the proposed changes discussed above. This withdrawal was agreed to in a telephone call with the Staff on August 21, 1995, and is in response to a letter from the NRC on the same subject dated August 3, 1995.<sup>(2)</sup> The

- 
- (1) J. F. Opeka letter to U.S. Nuclear Regulatory Commission, "Service Water Pump Flood Protection," dated December 16, 1994.
  - (2) G. S. Vissing (U.S. Nuclear Regulatory Commission) letter to J. F. Opeka, "Proposed Revision to Technical Specifications Related to Service Water Pump Flood Protection (TAC No. M91183)," dated August 3, 1995.

correction of the typographical error was resubmitted on September 11, 1995,<sup>(3)</sup> as part of a subsequent amendment request.

As always, we are prepared to provide any additional information that the NRC Staff may need regarding this withdrawal. The NNECO contact for this issue is Mr. Rod S. Peterson at (203) 440-2074.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
