Subject: License Amendment Request 95-08: Feedwater Isolation - Low RCS T_{avg} Coincident with a Reactor Trip

Gentlemen:

North Atlantic Energy Service Corporation (North Atlantic) has enclosed herein License Amendment Request 95-08. This License Amendment Request (LAR) is submitted pursuant to the requirements of 10CFR50.90 and 10CFR50.4.

License Amendment Request LAR 95-08 proposes that the Seabrook Station Technical Specifications be revised to relocate Functional Unit 6.b, "Feedwater Isolation - Low RCS T_{avg} Coincident with a Reactor Trip" from Technical Specification 3.3.2. (Engineered Safety Features Actuation System Instrumentation) to the Seabrook Station Technical Requirements Manual which is a licensee controlled document.

LAR 95-08 has been reviewed and approved by the Station Operation Review Committee and the Nuclear Safety Audit Review Committee.

As discussed in the enclosed LAR Section IV, the proposed changes do not involve a significant hazard consideration pursuant to 10CFR50.92. A copy of this letter and the enclosed LAR have been forwarded to the New Hampshire State Liaison Officer pursuant to 10CFR50.91(b). In addition, North Atlantic has determined that LAR 95-08 meets the criteria of 10CFR51.22(c) for a categorical exclusion from the requirements for an Environmental Impact Statement (see Section VI enclosed).

North Atlantic requests NRC review of LAR 95-08 and issuance of a license amendment by December 1, 1995 (see Section V enclosed).
