DOCKET NUMBER

PROD. & UTIL. FAC. 50-29

'95 SEP 25 A10:03

(60FR46317)

I would like to express my approval and support for the Yankee Rowe decommissioning effort. There is no reason for delay as the minority of protesters call for.

OFFICE OF SECRETARY
DOCKETING & SERVICES
BRANCH

(76)

I am a Civil Engineer. I live in the Town of Charlemont, perhaps 10 miles downstream of Rowe Yankee. I have been impressed with Rowe Yankee Safety Record from the day the plant started and with their plans for decommissioning and removal of the plant. Delay in this case appears only to benefit the protesters who want to keep themselves and the issue in the headlines.

I see no reason why your Commission cannot allow Yankee to continue to dismantle and remove the plant to proper storage. I have no problem with the transporting of plant parts which may be radioactive through my Town or any other proper route.
