Subject: McGuire Nuclear Station
Docket Nos: 50-369 and 50-370
Generic Letter 89-10

Gentlemen:

This is to inform you of our intention to extend closure of the Generic Letter 89-10 program to December 28, 1995. This closure date readjustment is caused by the relative size of the McGuire GL 89-10 program (433 valves), additional valve testing in progress and development of analysis techniques for the remaining butterfly valves. Currently, Unit 1 outage is scheduled for December 8th, 1995 through January 19th, 1996. The Unit 2 outage is presently scheduled for March 20, 1996 through May 13th, 1996. Considering these outage dates, a time frame after June, 1996 for the GL 89-10 closure inspection is suggested.

We thank you for your assistance in this matter and in helping us bring this enhancement to nuclear safety to its final closure. Any questions on this matter may be directed to Dwin Caldwell at (704) 875-4328.

Very truly yours,

T. C. McMeekin
Vice President, McGuire Nuclear Station.
