U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

Subject: Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
GPU Nuclear Schedule for Responding to the NRC Request for
Additional Information Regarding Generic Letter (GL) 95-03
"Circumferential Cracking of Steam Generator Tubes"

In a letter dated August 30, 1995, the NRC requested additional information and/or clarification within 30 days regarding the June 20, 1995 GPU Nuclear response to Generic Letter (GL) 95-03, "Circumferential Cracking of Steam Generator Tubes." Because of the resource demands associated with steam generator tube inspection activities for the Cycle 11 Refueling Outage (11R), which began on September 8, 1995, additional time is needed. Based upon our current schedule, GPU Nuclear is requesting an additional 30 days to complete our response, which will then be due to the NRC on October 28, 1995.

Sincerely,

J. Knubel
Vice President and Director, TMI

cc: Administrator, Region I
TMI-1 Senior Project Manager
TMI Senior Resident Inspector
