Department of Environmental Protection

Stanley J. Pac
Commissioner

State Office Building Hartford, Connecticut 06115 06106

September 14, 1984

B.J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Youngblood:

The Connecticut Department of Environmental Protection (DEP) hereby requests an extension of the comment period for the Draft Environmental Statement (DES) related to the operation of Millstone Nuclear Power Station, Unit No. 3 (NUREG-1364). The reason for this action is the lack of timely notification of the availability of this document when it was released in late July.

Despite its role as the principal State agency dealing with environmental matters, the DEP was not included on the list of agencies and organizations asked to comment on the DES. Furthermore, the Department has regulatory authority with regard to water use by the facility and is responsible for consistency determinations under the Coastal Zone Management of 1972.

Due to this startling oversight, DEP did not learn of the existence of the DES until early September when several articles appeared in local newspapers. We have since borrowed the copy made available to the State Clearinghouse and have initiated our review. However, because of the scope of the project and the multidisciplinary effort required for a comprehensive review, it is impossible to complete the task within the original comment period.

Therefore, the Department of Environmental Protection requests that the comment period be extended one month to October 17, 1984. Any questions regarding this matter should be directed to David Fox of the Planning and Coordination/Coastal Management Office at (203)566-3740. Thank you for your anticipated cooperation.

Sincerely,

Stanley J. Pac
