Subject: Submittal of Revision 7a to the Fermi 2
Updated Final Safety Analysis Report (UFSAR)

Enclosed are one original and 10 copies of revised pages of UFSAR for Revision 7a. Detroit Edison submitted Revision 7 to the UFSAR in May 1995 (Reference 2). This UFSAR update is to incorporate changes to the Quality Assurance (QA) program as a result of NRC approval of Technical Specification Amendment 104 which was not approved at the time of the Revision 7 submittal. Changes associated with Revision 7a are annotated by a revision bar in the margin with a "7a" and marked at the foot of the page with "Rev. 7a 9/95."

In addition to the QA program change, several additional revised pages are included in this package. These revised pages are to retract the references to a plant modification that has not yet been implemented and one page that was inadvertently omitted from the Revision 7 submittal. These pages are annotated with their appropriate revision(s) in the margin and at the foot of the page.

The enclosure includes Revision 7a instructions, a new List of Effective Pages and the replacement pages for this revision.

One copy is being sent to Region III and one copy to the NRC Resident Inspector.

If you have any further questions regarding this UFSAR update, please contact Ms. M. Offerle at (313) 586-1661.

Sincerely,

A handwritten signature in cursive script, appearing to read "Robert McKeon".

Enclosures

Revision 7a Instructions

September 29, 1995

Prior to incorporating UFSAR Revision 7a changes, ensure that the UFSAR is updated with Revision 7 (dated May 8, 1995) and Revision 7 errata (errata instructions dated June 7, 1995).

To incorporate UFSAR Revision 7a changes remove the existing pages and insert the replacement pages as described below.

After the Revision 7a is incorporated initial and record the date of incorporation on the Record of Change page.
