SUBJECT: NRC INSPECTION REPORT 50-445/95-16; 50-446/95-16

This refers to the maintenance reliability initiative inspection conducted by Messrs. C. E. Johnson, C. A. Clark, and G. E. Werner of this office on August 8-18, with in-office review of records until August 22, 1995. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report. On September 13, 1995, your staff was contacted and informed of the inspection follow-up item identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements.

During this inspection four examples of failure to follow procedures were identified. The failures to follow procedures indicated a lack of attention to detail by personnel. Management attention in this area is needed to reinforce the importance of procedural adherence. These failures constituted violations of minor significance and are being treated as Noncited Violations, consistent with Section IV of the NRC Enforcement Policy.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas P. Gwynn", written over a large, stylized circular flourish.

Thomas P. Gwynn, Director  
Division of Reactor Safety
