St. Francisville, Louisiana 70775

SUBJECT: NRC INSPECTION REPORT 50-458/95-13

This refers to the inspection conducted by Mr. Howard F. Bundy and others of this office on August 14 through September 1, 1995, at the River Bend Station facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report. Appropriate licenses have been issued to 9 of 11 applicants, who successfully completed all portions of their examinations.

Areas examined during the inspection are identified in the report. The inspection consisted of a review of the qualifications of applicants for operator licenses at the River Bend Station, which included an eligibility determination and administration of comprehensive written examinations and operating tests. The results of this inspection are documented on page 2 in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas P. Gwynn".

Thomas P. Gwynn, Director
Division of Reactor Safety
