Dear Mr. Lundvall:

The NRC has provided a relief from a requirement of the ASME Boiler and Pressure Vessel Code, Section XI, which BG&E has determined to be impractical, in accordance with your application dated March 6, 1984.

The code relief, granted in accordance with 10 CFR Part 50, Section 50.55a (g)(6)(i), relates to the extension of the Unit 1 Inservice Inspection (ISI) interval to terminate on April 1, 1987 rather than the currently required date of May 8, 1985. This extension allows the Unit 1 and Unit 2 ISI programs to be updated to the same edition of Section XI of the ASME Boiler and Pressure Vessel Code and Addenda.

A copy of our Safety Evaluation is enclosed. We have also enclosed a copy of the "Notice of Environmental Assessment and Finding of No Significant Impact" which was published in the Federal Register on August 24, 1984 (49 FR 33764).

Sincerely,

Original signed by:

James R. Miller, Chief  
Operating Reactors Branch #3  
Division of Licensing
