VOGTLE ELECTRIC GENERATING PLANT - UNITS 1 AND 2
INFORMATION CONCERNING ARCHAEOLOGICAL AND HISTORICAL
RESOURCES EXEMPT FROM PUBLIC DISCLOSURE

Dear Mr. Denton:

By my letter of August 3, 1984 (File X7T02.6, Log: GN-400), Georgia Power Company provided consultants reports and Cultural Resource Management Plans (CRM) delineating historical and archaeological properties along certain transmission line rights-of-way associated with the Vogtle project. As noted in that letter, additional reports and CRM plans were being developed and would be submitted as they became available.

Attached are the Consultant's report, CRM Plan, and submittal letter to the Georgia State Historic Preservation Officer for the Wadley/Wallace Dam portion of the Vogtle/Scherer transmission line. Documentation for the Vogtle/Wadley portion was submitted with my letter of August 3, 1984. This information is being provided with the understanding that it will not be subject to public disclosure. Withholding this information from public disclosure is necessary to protect these resources and insure their preservation. The basis for withholding from public disclosure were stated in my letter of August 3, 1984.

Additional reports and CRM plans are being developed for submittal to the State Historic Preservation Officer for the transmission lines associated with the Vogtle Electric Generating Plant. Such reports will be submitted to you under the same conditions noted herein as they become available.

If you have any questions concerning the enclosed information please contact us.

Yours very truly,

D. O. Foster

S: Plant Vogtle Project
R: CRM/Vogtle-Scherer Transmission Line
Wadley-Wallace Dam Section

Dr. Elizabeth A. Lyon
State Historic Preservation Officer
Historic Preservation Section
Department of Natural Resources
270 Washington Street, S.W.
Atlanta, Georgia 30334

Dear Dr. Lyon:

Georgia Power Company is conducting cultural resource management planning actions for a transmission line under construction between the Vogtle Electric Generating Plant (VEGP-Burke County, Georgia) and the R. W. Scherer Electric Generating Plant (Scherer-Monroe County, Georgia). Garrow and Associates, Inc., has completed a resource inventory and assessment study for a 56.4 mile section of that line, known as the Wadley to Wallace Dam Section. A copy of their final report is enclosed.

Garrow and Associates has identified one cultural property listed on the National Register of Historic Places and twenty-five (25) which they recommend as eligible for listing therein. Thus, a total of twenty-six (26) properties are recommended for management consideration by Georgia Power Company.

Georgia Power Company has assessed resource treatment alternatives for the twenty-six (26) properties. A copy of a tentative resource treatment plan for those properties is also enclosed. This plan discusses resource management planning activities to date and sets out Georgia Power Company's intentions with regard to the management of those properties.

Dr. Elizabeth A. Lyon
September 13, 1984
Page Two

Georgia Power Company solicits your review and comments upon these planning actions. Specifically, we are seeking your comments regarding the potential National Register eligibility of the twenty-five (25) properties recommended by Garrow and Associates, as well as the treatment measures proposed for all twenty-six (26) properties included in the tentative treatment plan. Please submit any comments to: James J. Shive, Georgia Power Company, Land Department, P.O. Box 4545, Atlanta, Georgia, 30302. Due to scheduling of activities associated with the construction of this line, we request your comments by October 25, 1984.

We appreciate this opportunity to work with you in the management of Georgia's non-renewable cultural resources. If you have any questions concerning the enclosed documents or this request, please contact me.

Sincerely,

James J. Shive
Archaeologist
