Dallas, Texas 75201-3411

SUBJECT: NRC INSPECTION REPORT 50-445/95-19; 50-446/95-19

This refers to the inspection conducted by Messrs. M. Runyan and C. Myers of this office on August 21-25 and September 5-8, 1995, at the Comanche Peak Steam Electric Station, Units 1 and 2, facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The inspection involved a review of activities performed by your staff to complete commitments made in response to Generic Letter 89-10, "Safety-Related Motor-Operated Valves Testing and Surveillance." Within this area, the inspection consisted of selective examinations of procedures and representative records and interviews with personnel. The results of this inspection are documented in the enclosed report.

As discussed in the report, we concluded that your motor-operated valve program was exceptional in scope and precision. You are to be commended for developing and implementing such a strong program to address this safety-significant issue. All significant issues related to your Generic Letter 89-10 motor-operated valve program were resolved during this inspection. Accordingly, we are closing the NRC review of your Generic Letter 89-10 program. We will continue to inspect elements of your motor-operated valve program as part of our ongoing inspection activities.

Two matters remain to be addressed with respect to your motor-operated valve program, related to pressure locking/thermal binding and your periodic verification activities for motor-operated valves. The first matter was the subject of NRC Generic Letter 95-07 and the second matter is currently under review within the NRC. We will address these matters during future interactions with your staff.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
