BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
COCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62
SUPPLEMENTAL REPLY TO NOTICE VIOLATION (EA 91-158)

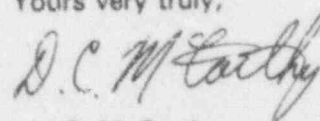

Gentlemen:

On January 3, 1992, the Nuclear Regulatory Commission issued a Notice of Violation as part of Enforcement Action (EA) 91-158 for issues at the Brunswick Steam Electric Plant, Units 1 and 2. By letter dated February 14, 1992, Carolina Power & Light Company responded to the Notice of Violation.

As addressed in the response to Example A of Violation I, the Brunswick Nuclear Project indicated that revision of Operating Procedures and Periodic Tests to remove ambiguities associated with repeated steps (for redundant system loops) within these plant procedures would be accomplished by April 1, 1992. Thirty-nine (39) procedures were identified as requiring revision to address this concern. During the revision process, two (2) of the thirty-nine procedures were re-evaluated and determined to be adequate; therefore, these two procedures were not revised. Revision of the last of the thirty-seven affected procedures was completed April 28, 1992.

Please refer any questions regarding this information to Mr. S. D. Floyd at (919) 457-2404.

Yours very truly,

D. C. McCarthy
Manager
