Gentlemen:

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS) CHANGE 92-06,
"ADMINISTRATIVE CHANGES TO SECTION 6.0"

In accordance with 10 CFR 50.90, we are enclosing a requested amendment to licenses LPR-77 and DPR-79 to change the TSs of SQN Units 1 and 2. The proposed change revises Specification 6.2.3.4 to reflect a current restructuring within TVA's Nuclear Power organization. This is an administrative change that specifically addresses Independent Safety Engineering (ISE) with regard to the title of the manager to whom ISE reports.

As part of a previous organizational change in September 1991, TVA brought the corporate Nuclear Experience Review function into the Nuclear Managers Review Group (NMRG). At that time, TVA changed the name of the group from NMRG to Nuclear Reviews to more accurately reflect the expanded organizational responsibilities. That change did not impact ISE because the same reporting relationships were maintained. It was planned to update the title in a subsequent TS revision.

A further organization change has been made that affects the reporting relationship of Nuclear Reviews. To provide a sharper focus on oversight activities, we have combined the two major oversight functions, Nuclear Quality Assurance and Nuclear Reviews, in a new organization--Nuclear Assurance. The manager, Nuclear Reviews, will remain as a high-level

technically-oriented corporate manager not in the management chain for power production and not an integral part of the quality assurance organization. This organization change was described in the most recent update to the TVA Organization Topical Report submitted to NRC on April 17, 1992.

Also, we are proposing to make other minor changes to Section 6.0 of the TS. The proposed changes to Specifications 6.3.1 and 6.4.1 are to conform to current regulatory guidance on staff training and qualifications. Proposed changes to Specifications 6.5.1.2 and 6.10.2i are minor administrative changes to be consistent with TVA's current nomenclature and organizational structure.

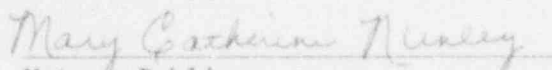

The proposed TS change is identified in Enclosure 1. The justification for the proposed TS change is provided in Enclosure 2. A proposed determination of no significant hazards consideration performed pursuant to 10 CFR 50.92 is provided in Enclosure 3.

Please direct questions concerning this issue to P. J. Hammons at (615) 751-2736.

Sincerely,

J. L. Wilson
