In the Matter of
DUKE POWER COMPANY, ET AL.
(Catawba Nuclear Station, Units 1 and 2)
Docket Nos. 50-413 and 50-414 o/c

Dear Mr. Guild:

In response to the Licensing Board's directions of September 21, 1984, I am forwarding herewith by express mail documents which form the underlying basis for Staff Inspection Report Nos. 50-413/84-88, 50-414/84-39. Documents underlying Staff Inspection Report Nos. 50-413/84-31 and 50-414/84-17 are being forwarded separately from Region II. The documents being forwarded are in a Freedom of Information Act response format, since they have also been the subject of an FOIA request. There are three categories of documents: (1) documents being placed in the public document room; (2) documents already in the public document room, and (3) documents which are being partially withheld under specific FOIA exemptions. All such documents are enclosed.

The information deleted from the third group above falls into the following categories: the names of individuals who have provided information to the NRC on a confidential basis; information which would tend to identify the identity of such a confidential NRC source; the identities of individuals who provided information to Duke Power Company on a confidential basis, as well as information, including identities, concerning other individuals, which would constitute an unwarranted invasion of personal privacy.

Sincerely,

George E. Johnson
