SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security Program for Power Reactors. Specific areas evaluated were: Management Support; Security Program Plans; Protected and Vital Area Barriers; Detection Aids and Assessment Aids; Protected and Vital Area Access Controls of Packages, Personnel and Vehicles; Alarm Stations and Communications; Testing, Maintenance and Compensatory Measures; Security Training and Qualification; and Physical Protection of Safeguards Information.

Results:

In the area inspected, no violations were identified. One item of concern pertained to the licensee's Isolation zone requirements in the Physical Security Plan (see Paragraph 5). Otherwise, the security organization and security force continues to perform their duties in a professional and effective manner. The licensee effectively provides an acceptable level of protection for the station's vital resources.
