NUCLEAR

BECO. 84-157
September 21, 1984

Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

License No. DPR-35
Docket No. 50-293

Dear Sir,

By letter of August 9, 1984, Boston Edison proposed an amendment to Pilgrim Nuclear Power Station's technical specifications. This proposed amendment, in part, modified existing technical specifications concerning torus water temperature monitoring instrumentation, and included into technical specifications new instruments associated with post-accident monitoring.

Based on the August 30 and September 7, 1984 telephone discussions between the MRC and Boston Edison concerning the amendment, Boston Edison requests that, in accordance with NRC recommendations, (1) be substituted for (7) under the heading NOTES on pages 58 and 58a for the following instrument channels: Suppression Chamber Water Temperature, Torus Water Level (wide range), Containment Pressure (high range), and Containment Pressure (low range).

Should you require further information on this request, please contact us.

Very truly yours,

W.D. Harrington

PMK/ns

Commonwealth of Massachusetts)
County of Suffolk)

Then personally appeared before me W. D. Harrington, who, being duly sworn, did state that he is Senior Vice President - Nuclear of Boston Edison Company, the applicant herein, and that he is duly authorized to execute and file the submittal contained herein in the name and on behalf of Boston Edison Company and that the statements in said submittal are true to the best of his knowledge and belief.

My Commission expires: *October 21, 1988*

Peter M. Fahler
