Mr. J. P. Bayne
Executive Vice President,
Nuclear Generation
Power Authority of the State
of New York
123 Main Street
White Plains, New York 10601

Dear Mr. Bayne:

SUBJECT: DEGRADED GRID VOLTAGE

Re: James A. FitzPatrick Nuclear Power Plant

Our letter dated June 3, 1977 requested that you evaluate the susceptibility of the safety-related electrical system at the James A. FitzPatrick facility to a sustained degradation in voltage of offsite power sources. By letter dated October 17, 1977 you responded by proposing design modifications and changes to the Technical Specifications to conform to the Staff Positions contained in our letter.

It has been recently brought to my attention that, inadvertently, our Safety Evaluation (SE) concerning your proposed design modifications and Technical Specification changes, was never forwarded to you. The SE, which we are now enclosing, concludes that your proposed design modifications and associated Technical Specification changes comply with the Staff Positions and are therefore acceptable.

We regret any inconvenience this may have caused you.

Sincerely,

Original signed by/

Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
