Subject: Significant Deficiency Report #120
Final Report on Paul Munroe Electric-Hydraulic
Valve Actuator Deficiency
Limerick Generating Station, Units 1 and 2
NRC Construction Permit Nos. CPPR 106 and 107

References: 1) Interim Report, dated December 22, 1983
2) Final Report, dated September 4, 1984

File: QUAL 2-10-2 (SDR #120 and 147)

Dear Dr. Murley:

In our Final Report (Reference 2) on the above subject deficiency, it was stated that all valve actuators will have been corrected and tested to assure proper operation by September 14, 1984. We have now determined that additional time will be needed to complete the installation and testing of the valve actuators. It is now expected that all valve actuators will be corrected and tested to assure proper operation by September 28, 1984.

If there are any questions on this matter, we would be pleased to discuss them with you.

Sincerely,

JW Sullaghan
for
JS Kemper
