

SEP 28 1984

Docket No. 50-266  
Docket No. 50-301

Wisconsin Electric Power Company  
ATTN: Mr. C. W. Fay  
Vice President  
Nuclear Power Department  
231 West Michigan, Room 308  
Milwaukee, WI 53201

Gentlemen:

We have completed our review of Revision 1 and Revision 2 to your Quality Assurance Program Description (QAPD), Section 1.8 of your Final Safety Analysis Report (FSAR), submitted to us by your letters dated June 11, 1983 and June 28, 1984. These revisions pertain to the QAPD for the operation of Point Beach Nuclear Plant Units 1 and 2.

Based on that review, we have concluded that Revision 1 is acceptable in its entirety and, with one exception, Revision 2 is also acceptable. Specifically, Section 1.8.7 of Revision 2 contains provisions regarding conditional releases of equipment and material which we do not find acceptable. As a result of the telephone conversation between members of our respective staffs on September 26, 1984, it is our understanding that you will not continue to implement the Revision 2 change specified in Section 1.8.7.

Please contact Mr. F. Hawkins of my staff (312-790-5555) with any questions you have regarding this matter.

Sincerely,

"Original signed by R.L. Spessard"

R. L. Spessard, Director  
Division of Reactor Safety
