JOHN S. KEMPER
VICE-PRESIDENT
ENGINEERING AND RESEARCH

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Docket No.: 50-352

Subject: Limerick Generating Station, Unit 1
Independent Design Verification Program

Reference: Letter from A. Schwencer, NRC to
E. G. Bauer, PECO dated September 12, 1984

Files: GOVT 1-1 (NRC)
QUAL 12 (Design Review)

Dear Mr. Schwencer:

Pursuant to the request outlined in the reference letter we have reviewed the potential findings resulting from the IDVP work in progress. Based on the information now available to us within the protocol of the Program it is our judgement that there is no reasonable basis for concluding that the Potential Finding Reports either individually or in the aggregate suggest any serious concerns regarding the adequacy of the Core Spray System or the effectiveness of the design process. There does not appear to be any potential finding(s) that would delay the startup program or full power operation.

We have requested Torrey Pines Technology to provide an independent assessment of the IDVP work in progress as you have requested.

Sincerely,

JW Gallagher
for
JS Kemper
