Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Byron Generating Station Units 1 and 2  
Shift Advisors  
NRC Docket Nos. 50-454 and 50-455

Reference (a): July 23, 1984 letter from T. R. Tramm  
to H. R. Denton:

Dear Mr. Denton:

This letter provides updated information regarding the use of shift advisors during the startup of Byron 1. These revisions to the information provided in reference (a) have already been discussed with the NRC staff. With these revisions, we understand that our shift advisor program is acceptable and we will continue to implement it.

Byron's shift advisor program has recently been evaluated by a Utility Shift Advisor Program Evaluation Team. Their comments and recommendations have been incorporated into certain station procedures. Five additional people have also been added to the shift advisor program since our previous correspondence with the NRC on this topic. Several of the appendices to reference (a) therefore need to be updated. The appendices to this letter are identified as follows:

- (1) Appendix B provides resumes and a copy of the operator license for each Shift Advisor.
- (2) Appendix C provides those procedures which have been revised to incorporate the Evaluation Team comments.
- (3) Appendix D provides those training program procedures which have been revised to incorporate the Evaluation Team comments.
- (4) Appendix E provides an update of the exam grades for the additional Shift Advisors.

The procedures provided here are the current versions and may be revised. Future revisions will not be submitted but the current version will always be available for NRC review.

Please address further questions regarding this matter to this office.

One signed original and fifteen copies of this letter and the attachments are provided for NRC review.

Very truly yours,

T. R. Tramm  
Nuclear Licensing Administrator

Revised Shift Advisor Resume's

U.S. NUCLEAR REGULATORY COMMISSION

OPERATOR LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and subject to the conditions and limitations incorporated herein, the Nuclear Regulatory Commission hereby licenses:

Mr. Roger T. Anderson  
324 S.W. 17th Avenue  
Homestead, Florida 33030

LICENSE NO. OP - 5617

DOCKET NO. 55 - 7982

EFFECTIVE DATE October 1, 1981

AMENDED DATE

to manipulate all controls of the following facility or facilities:

Turkey Point Nuclear Station, Unit No. 3, Facility License No. DPR-31,  
Unit No. 4, Facility License No. DPR-41,  
located in Dade County, Florida

This license is subject to the provisions of Section 55.31 of the U.S. Nuclear Regulatory Commission's regulations, Title 10, Code of Federal Regulations, Chapter 1, Part 55, with the same force and effect as if fully set forth herein.

In manipulating the controls of the above facility or facilities, the licensee shall observe the operating procedures and other conditions specified in the facility license which authorizes operation of the facility or facilities and shall comply with the following conditions:

The licensee shall wear corrective eyeglasses while performing the activities for which he is licensed.

The issuance of this license is based upon examination of the licensee's qualifications, including the representations and information contained in his application for license filed under the docket number indicated above.

Unless sooner terminated, this license shall expire two years from the effective date.

A copy of this license has been made available to the facility licensee indicated below.

Florida Power & Light Company  
ATTN: Station Superintendent  
Turkey Point Nuclear Station  
P.O. Box 529100  
Miami, Florida 33152

For the Nuclear Regulatory  
Commission

  
S. H. Hanauer

Director, Division of Human Factors Safety  
Office of Nuclear Reactor Regulation
