The Impell Corporation has recently submitted a pair of proprietary topical reports entitled 61TRAK ("An Isotope Behavior Analysis Computer Program") and WASTETRAK ("A Low-Level Radioactive Waste Tracking and Shipping Optimization Program"). Both topical reports describe computer programs which are intended to assist licensees such as operators of nuclear power plants in complying with NRC waste classification and DOT waste transportation regulations.

For your information, the Impell Corporation will be presenting a briefing on their computer programs on Thursday, August 9. The briefing will be held in the 7th floor conference room in the Willste building beginning at 9:00 am.

If you have questions, please contact me at 74791.
