

Docket Nos.: 50-445
and 50-446

SEP 21 1984

Mr. M. D. Spence
President
Texas Utilities Generating Company
400 N. Olive Street
Lock Box 81
Dallas, Texas 75201

Dear Mr. Spence:

Subject: Request for Additional Information Concerning the Handling of
Heavy Loads at the Comanche Peak Steam Electric Stations
(Units 1 and 2)

As a part of its continuing review of the Comanche Peak FSAR, the staff has requested that the following additional information be provided regarding the handling of heavy loads:

1. Describe the means provided to assure the integrity of concrete structures, lifting eyes, and any other heavy loads so that they will not fall apart while being handled during refueling should the lifting eye fail or the plug impact other structures.
2. Alternatively, describe the consequences of failure of concrete structures or other heavy loads during handling. Your response should contain an evaluation to confirm that unacceptable fuel damage or damage to safety related equipment will not occur.

Your staff was advised of this forthcoming request by telephone. This letter serves to formally document the staff's request.

Please advise Mr. John Stefano of my staff when we may expect to receive your response upon receipt of this letter.

Sincerely,

B. J. Youngblood, Chief
