Mr. Harold R. Denton, Director Office of Nuclear Reactor Regulation U. S. Nuclear Regulatory Commission Washington, D. C. 20555

Attention: Ms. E. G. Adensam, Chief Licensing Branch No. 4

Re: Catawba Nuclear Station
Docket Nos. 50-413 and 50-414

Dear Mr. Denton:

Proposed License Condition 6, Inadvertent Boron Dilution, which was attached to Facility Operating License NPF-24 for Catawba Unit 1, required that redundant boron dilution alarms be installed and operable in the Control Room prior to initial criticality. This is to advise that an independent alarm has been installed and verified operable for each source range flux channel.

Very truly yours,

Day B. Tech

Hal B. Tucker
