MAY 1 1984

MEMORANDUM FOR:

David Brooks  
Geochemistry Section  
Geotechnical Branch  
Division of Waste Management

FROM:

Warren Rehfeldt  
BWIP Project Section  
Repository Projects Branch  
Division of Waste Management

SUBJECT:

DRAFT TOPICAL REPORT - REVIEW AND ASSESSMENT OF  
RADIONUCLIDE SORPTION INFORMATION FOR THE BWIP SITE.

As requested in your April 10, 1984 memorandum to Robert Wright, the subject report has been reviewed by BWIP Project Section staff. The contents of the report were also discussed with Don Kelmers, ORNL, during his visit on April 12.

The report, which we understand will serve as the basis for NRC's technical position on sorption, appears to be well organized and complete. We have no additional comments.
